## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Flick (5,719,551).

At col.2, lines 7-15 Flick recites: With multiplexing technology, the various electronic modules or devices may be linked by a single wire in a bus also containing a power wire and one or more ground wires. Digital messages are communicated to all modules over the data communication bus. Each message may have one or more addresses associated with it so that the devices can recognize which messages to ignore and which messages to respond to or read.

The response of the element of a multiplexed system is always a switching operation. The Flick teachings meet all of the claim limitations related to interfacing the elements with the single electrical line.

### ***Allowable Subject Matter***

Claims 6-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 12-21 allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or fairly suggest the limitations recited in the claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen W. Jackson whose telephone number is 571-272-2051. The examiner can normally be reached on 6:30am-3:00pm M-F.
